### 4. Elm Alley School Street

Transform Elm Alley by the Tenderloin Community School into a School Street - an outdoor space for kids to play during school hours. The street will be closed 8 am to 4 pm M-F with the potential of extending the closure hours to the weekend for all Tenderloin children and their families to use. The street will feature games, fence art and a street mural, all designed by the adjacent school community. The project sponsor has filed for a permit and is waiting for City approval.

### 5. Larkin Street Green Canopy Project

The project will install two parklets on Larkin Street, supported and maintained by local merchants. This will be the first step toward a green Larkin Street corridor: planting new trees along with recent installation of outdoor lights and an Ambassador Program, will help revitalize businesses on the Larkin Street commercial corridor. The project will be filing a permit in October 2024 for potential installation in Winter 2024.

### 6. Tenderloin National Forest Stabilization

The project will support a more consistent care, staffing and ongoing community programs to the Tenderloin National Forest (TNF), an important community outdoor green and art space. The project will hire a new part-time staff in Winter 2024 to coordinate park maintenance and new programs at the site.

### 7. Tenderloin Dog Park

The scope of this project is currently being modified in collaboration with the project sponsor. This modified project will support the current Barklet dog park on Myrtle Alley and will promote a regular closure of the alley for special dog-themed events. This initiatives will increase open space access, offering open space for dogs to run and play while fostering community connection.
